FOREWORD	ix
GLOSSARY	xi
1 INTRODUCTION AND SCOPE	2
1.1 Introduction	2
1.2 Scope and purpose of the <i>Guide</i>	2
1.3 Status of the <i>Guide</i>	3
2 PRINCIPAL RESPONSIBILITIES	6
2.1 General	6
2.2 Responsibilities of clients, venue owners and event organisers	6
2.3 Responsibilities of designers and contractors	7
2.4 References	7
3 HAZARDS AND RISKS RELATING TO DEMOUNTABLE STRUCTURES	10
3.1 Hazards	10
3.1.1 Design hazards	10
3.1.2 Erection and dismantling hazards	10
3.1.3 Operational hazards	10
3.2 Risk assessment	10
3.3 Steps to minimise risks	11
3.3.1 Design	11
3.3.2 Erection and dismantling	11
3.3.3 Operation	12
3.4 Crowd behaviour	12
3.4.1 Introduction	12
3.4.2 Crowds	13
3.4.3 Crowd control or crowd management	14
3.5 Fire	15
3.6 Safety planning	16
3.6.1 Introduction	16
3.6.2 The safety plan	16
3.7 References	16
4 STATUTORY CONTROL	20
4.1 General	20
4.2 Building Regulations	20
4.2.1 England and Wales	20
4.2.2 Scotland	20
4.2.3 Northern Ireland	20
4.3 Planning permission	21
4.4 Premises licensed for public entertainment (not including sports grounds)	21
4.4.1 England and Wales	21
4.4.2 Scotland	21
4.4.3 Northern Ireland	22
4.5 Sports grounds	22
4.5.1 Sports grounds safety certification	22
4.5.2 Sports grounds prohibition notices	24
4.6 Public Health Acts Amendment Act 1890	24
4.7 Local acts in England and Wales	24

4.8	Fire precautions	25
4.9	Health and Safety at Work etc. Act 1974	25
4.10	References	25
5	PROCUREMENT AND USE	28
5.1	Procurement	28
5.1.1	General	28
5.1.2	Specification of requirements	28
5.1.3	Compliance with regulations	29
5.1.4	Design and checking	29
5.1.5	Equipment checking	29
5.2	Documents	30
5.2.1	Safety policies	30
5.2.2	Risk assessments and safety plans	30
5.2.3	Method statements	30
5.2.4	Major incident plans	30
5.2.5	Fire certificates	30
5.2.6	Independent erection check and completion certificate	30
5.2.7	Document check list	30
5.3	Use	32
5.3.1	Supervision during the event	32
5.3.2	Access and egress	32
5.3.3	Electrical installations and lightning protection	32
5.3.4	Fire safety	32
5.3.5	In-service inspection and maintenance	32
5.4	References	33
6	GROUND AND SITE CONDITIONS	36
6.1	Introduction	36
6.2	Information	36
6.3	Basic principles	36
6.4	Ground bearing pressures	37
6.5	Foundations	37
6.6	Soleplates, baseplates and spreaders	38
6.7	Ground anchors	39
6.8	Sloping ground	39
6.9	Site drainage	40
6.10	Inspection	40
6.11	References	40
7	ERECTION, INSPECTION AND DISMANTLING	42
7.1	Erection	42
7.1.1	Planning	42
7.1.2	Work on site	42
7.1.3	Erection check	44
7.2	Dismantling	45
7.3	Inspection of components	45
7.3.1	Repeated use of components	45
7.3.2	Scaffolding components	46
7.3.3	Inspection of structural components used repetitively	46
7.4	References	48

8	WIND LOADING	50
8.1	Introduction	50
8.1.1	General	50
8.1.2	Basic principles	50
8.1.3	Design principles	52
8.2	Wind loading on structures	53
8.2.1	Grandstands	54
8.2.2	Stages	54
8.2.3	Special Structures	54
8.2.4	Operations management for wind Option (b)	55
8.3	Wind loading on tents and marquees	56
8.3.1	Basis	56
8.3.2	PTA Method	56
8.4	References	58
9	GRANDSTANDS	60
9.1	Introduction	60
9.2	Materials	60
9.3	Design principles	60
9.4	Design guidance	62
9.4.1	General	62
9.4.2	Loading	62
9.5	Connections	65
9.6	Loading tests	65
9.7	Layout criteria (means of escape)	66
9.8	Barriers and handrails	66
9.8.1	General	66
9.8.2	Protection against falling	66
9.8.3	Design of barriers	67
9.9	Demountable standing accommodation	67
9.10	Viewing facilities for wheelchair users	68
9.10.1	General	68
9.10.2	General principles	68
9.10.3	Design requirements – platforms	69
9.10.4	Design requirements – access ramps	69
9.10.5	Seating arrangements and capacities	70
9.11	References	72
10	STAGES AND SIMILAR STRUCTURES	74
10.1	Introduction	74
10.2	General design requirements	74
10.2.1	Introduction	74
10.2.2	Calculations	74
10.3	Stage types	75
10.3.1	Stage floor platforms and associated sub-structures	75
10.3.2	Roofs	76
10.3.3	Free standing roof systems	77
10.3.4	Roof systems that are supported on a stage floor	77
10.3.5	Roof systems supported within the sub-structure of a stage floor	77
10.3.6	Fully integrated units that are typically vehicle based	78
10.4	Access and egress for non-public use	78
10.5	Protection against falling	79
10.6	Use of lifting equipment in the construction and use of stages	80
10.7	References	80

11	BARRIERS FOR EVENTS	82
11.1	Introduction	82
11.2	Design	85
11.2.1	Design loading	86
11.3	Hoarding or fences outwith the main viewing areas	87
11.4	Site conditions/barrier performance	87
11.5	Multiple barrier arrangements	88
11.6	Event risk assessment	89
11.7	Installation and inspection	89
11.8	References	89
12	TENTS AND MARQUEES	92
12.1	Introduction	92
12.2	Design	93
12.2.1	General	93
12.2.2	Anchors	93
12.2.3	Wind loading	94
12.2.4	Flame retardancy of fabric and materials	94
12.3	Procurement and use of tents and marquees	95
12.3.1	Safety considerations – client	95
12.3.2	Safety considerations – contractor	96
12.4	Erection, inspection and dismantling of tents and marquees	96
12.4.1	Erection	96
12.4.2	Inspection	96
12.4.3	Dismantling	97
12.5	Verification	97
12.6	References	98
13	ANCILLARY AND SPECIAL STRUCTURES	100
13.1	Introduction	100
13.2	Design	100
13.2.1	General considerations	100
13.2.2	Verticality	101
13.2.3	Stability	101
13.2.4	Overloading	101
13.2.6	Scaffold	102
13.2.7	Access	102
13.3	Masts and towers	102
13.4	Catenary wire ropes	103
13.5	Hospitality units	104
13.6	References	104
	APPENDIX
